

Sewwandi Rathnayaka

Software Engineering Undergraduate

📍 Sri Lanka @ sr4545582@gmail.com 📄 [Github](#) 📌 [LinkedIn](#)

Summary

I am a 4th year Software Engineering undergraduate with hands-on experience building modern web applications using JavaScript, React, Node.js, and REST APIs. I enjoy transforming ideas into functional, user-friendly solutions and continuously improving my skills through real-world projects. I am currently strengthening my backend knowledge with Spring Boot and exploring modern frontend frameworks like Next.js. I am passionate about learning, problem-solving, and growing within a collaborative development environment.

Education

Sri Lanka Technological Campus
Bachelor in Software Engineering

August 2022 - Present

Skills

Frontend Development

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend Development

Node.js, Express.js, REST APIs, Spring Boot (basic – learning)

Databases

MongoDB, MySQL (CRUD operations, relational concepts)

Tools & Practices

Git & GitHub, VS Code, Postman, Figma, Agile basics, Debugging & Optimization

Currently Learning

Next.js, Spring boot

Projects

Handyman Service Application

December 2024 - Present

An innovative Handyman service website for Sri Lanka

🔗 <https://fix-frontend.netlify.app>

I worked on a full-stack web application that connects customers with service providers, focusing on both frontend and backend development. The project involved building responsive user interfaces using React and Tailwind CSS, implementing backend logic with Node.js and Express, and integrating database operations to support bookings and user workflows. Through this project, I gained experience collaborating across different parts of an application, debugging issues, improving performance, and delivering user-centered features through iterative development.

E-Commerce store

October 2024 - August 2025

Feature-rich e-commerce platform for online shopping

🔗 <https://fed-storefront-frontend-sewwandi.netlify.app>

This project involved developing a modern e-commerce platform with features such as product browsing, cart management, and checkout workflows. I contributed to building the frontend using React and Tailwind CSS and supported backend development using Node.js and Express. The project helped me strengthen my understanding of component-based architecture, REST API integration, database interactions, and clean coding practices while working in a structured, real-world-style development process.

Certifications

Professional Certification Full-stack Engineer

Aug 2025
